

IEEE JOURNAL ON

MULTISCALE AND MULTIPHYSICS COMPUTATIONAL TECHNIQUES

A PUBLICATION OF THE IEEE MICROWAVE THEORY AND TECHNOLOGY SOCIETY,
THE IEEE ANTENNAS AND PROPAGATION SOCIETY,
AND THE IEEE ELECTROMAGNETIC COMPATIBILITY SOCIETY

Special Section on

Computational Modeling for
Microwave Processing and
Characterization of Materials

Expected online publication: 2024 Volume

Authors of papers on the **computational modeling for microwave processing and characterization of materials**, are invited to submit papers to a special section of IEEE Journal on Multiscale and Multiphysics Computational Techniques (J-MMCT; 2023 Clarivate JCR Impact Factor: 2.3; Scopus CiteScore: 3.7).

We invite comprehensive review papers, original contributions and extended versions of conference papers and abstracts including those presented at (a) the IMS 2023 workshop on “Recent Advances in Microwave Power Applications”; (b) the NEMO 2023 special sessions on “Modeling-Based Wide-Band Electromagnetic Characterization of Materials” and “Modeling the Physics and Applications of Materials and Composites”; (c) relevant sessions/workshops at IMPI 57 and AMPERE 2023 conferences.

The expanded version of conference papers requires that the new technical content will include a more in-depth treatment, new results beyond the conference paper.

The J-MMCT Editorial Board will review every paper in the same manner as any other regular submission.

Paper submission is accomplished through the ScholarOne Manuscript Central website:

<http://mc.manuscriptcentral.com/jmmct-ieee>

When you prepare your manuscript you should consult the instructions, templates, and resources available at the IEEE Authors' Center (<https://ieeauthorcenter.ieee.org>). Papers not following the standard IEEE journal template cannot be accepted into the peer review process. Please be aware that your contribution should be **prepared as any other regular J-MMCT paper** and that it will be evaluated via the same peer-review process. The quality of your contribution **must meet the level required for a publication at J-MMCT**.

Other Submission instructions:

- (1) The conference paper(s) must be included along with the submission as supplementary files.
- (2) You must reference your own work, especially recent journal/conference publications. Discuss your related publications in the introduction. Distinguish the new results you present in your current manuscript from those found in your previous publications, **to demonstrate that the paper includes sufficient new technical material to justify a new paper, when compared to all previously published papers.**

Submissions are accepted any time, but no later than **December 31, 2023** for potential inclusion in the 2024 volume.

If you have any questions, you can contact the Editor-in-Chief (Prof. Costas Sarris at eic-jmmct@ieee.org), or the Guest Editors:
